

Hi, I am Robert, I am the current President of OSM and I want to run for another term as OSM President.

For people who don't know me please read the [manifesto](#) I have created 6 months ago. I want to make it short this time.

OSM has still a long list of things we have to do. I wanted to clean up / finish more tasks as I could do in the timeframe I am the president of OSM. Our biggest problem is the low number of people helping and spending time on issues beside the coding of our product. We reduced the number of board members and did a restructure so that we don't have such a big number of departments and teams. This will help us to concentrate and move forward faster. I am sure that next year we will be in a much better position as we are now in.

With Joomla4 we have a great product and we see more and more people using it, making migrations from Joomla3. The next versions we have in the pipeline will make Joomla even better.

I hope I get the chance to finish started tasks and help to go over the complicated time

Thanks for reading and I would be happy if you support me and join with me to work together and take Joomla forward.

Robert
