

Nadja Lamisch – Manifesto Treasurer

July 2024

Hi, my name is Nadja and I am the current treasurer.

Now that I have a work routine and we have been able to change and simplify some things, I would like to stay on and run for another term.

A main priority of course is to support the stabilization of OSM's financial situation. That's where I'll focus my energy, no doubt.

However, it's also imperative to me to further optimize the procedures and documentation, so that those who come after me can quickly and easily get up to speed.

Here are a few things about me:

I live with my family in Munich, Germany. I've been in web development since 2001. Touched Joomla! for the first time in 2012 and fell in love with it immediately.

Still fascinated by Joomla! in 2014 I joined the local Munich user group and joined the German JoomlaDay.

It was my first time attending the Leipzig 2018 event and I was able to expand my network with many of you. In addition, I became more involved in the organization.

Since 2018 I have been a speaker at the JoomlaDays in Germany and Austria.

A year later I got involved in the German JoomlaDay organization and since 2021 we have joined forces with Austria and Switzerland, to have a D-A-CH (Germany / Austria / Switzerland) combined event.

I was also part of the Joomla! 4 Backend Template team, batch of 2019.

Since two years I am now OSM treasurer and it would be my pleasure serving OSM for the coming term again.

Thanks for reading and I would be happy if you support me.

Nadja
